
Profile

As a computer science student with strong problem-solving skills and a passion for programming, I am committed to creating efficient and effective software solutions. With a particular interest in backend and full-stack development, I am seeking opportunities to apply my technical expertise and continue learning in a dynamic industry.

Education

University of Bielsko-Biała

2020 - Present | Bielsko-Biała

Computer Science

Specialization in software engineering

Projects

Event App

A web application for event registrations and an admin panel for managing workshops, participants, and prizes. Additionally, a mobile app is provided for scanning QR codes and drawing prizes. This was my engineering thesis and **was used** during a local IT conference.

Personal Website

A website created for a basic portfolio showcase and contact information, developed using Next.js App Router, with Acceternity UI integrated to modernize the design according to current trends and standards.

GDPR

I authorize the processing of personal data contained in my curriculum vitae based on art. 13 GDPR 679/16.
